

Regional Landcare and Seed Bank Info

SOURCING SEED – Landholders have the choice of collecting your own seed, or sourcing the appropriate seed from your regional Seedbank or seed collector. The seed must be indigenous to your local area. Be aware that some species have been imported and cause problems when cross breeding with local species, contaminating the local gene pool.

Below are the necessary regional contact details to make sourcing your own seed easier. Your local Landcare group (Victorian Landcare Gateway - <https://www.landcarevic.org.au/groups/>) or local council will advise you of the appropriate species for your area and the regional seed bank will tell you what seed is available.

COLLECTING YOUR OWN SEED - Many landholders choose to collect their own seed, which they send to TreeProject for our volunteers to propagate. Most collect it from their property or local remnant vegetation. If you are collecting seed you will need to identify the species to ensure they are local – and consider local grasses and shrubs as well as trees. Your Regional Landcare Coordinators or the Department of Sustainability and Environment will advise you on collection procedures

NOTE: **Seeding Victoria** is very large seedbank and services: North Central, Corangamite and parts of Glenelg-Hopkins and Port Phillip catchments

If your property is close to the border it's worth checking with the adjoining seed banks.
